

Finance Team — Reviewing & Approving Invoices

Task 1 of 2: decide each invoice in My Tasks.

Logging in (everyone, every time)

1. Go to <https://admin.drivelah.com>
2. Click **Sign in with Google** and choose your **@drivelah.sg** account. No separate password — it's your Drive lah email.
3. If you don't see the tabs you expect, sign out and back in once (your access refreshes on login).

What your job is

Review the invoices waiting to be paid and decide each one: **Approve**, **Reject**, or **Void**. If you need a question answered first, **Reassign** it.

Find your queue

1. On the main dashboard you'll see **My Tasks** with a number — that's how many invoices are waiting on you.
2. Click it to open your **Tasks** page. Invoices are listed **oldest first** — work from the top.

Read the card (click a task to open it)

- **Vendor + amount**, and a **Confidence** number (green = high, amber = medium, red = low).
- **Summary** — why we're paying this.
- **Risk flags** — things to check before you pay.
- **Trip / Ticket / Requester** — the context.
- Buttons: **View invoice**, **Edit invoice**, **Vendor payment history**.

Take the decision

- **Approve** — it's correct → approved for payment.
- **Reject** — it's wrong → give a reason.
- **Void** — kill it (e.g. a real duplicate) → give a reason.
- **Reassign** — need someone to answer first → pick the person (or requester), add a comment; it goes to their queue and comes back when they reply.

Watch for these

Double-pay check: CANDIDATE ALREADY-PAID means it may already be paid — open **Vendor payment history** before you approve.

Anything flagged as a duplicate cannot be approved until the duplicate is resolved.
