

HR Onboarding & Offboarding

A step-by-step guide for the Drive lah HR team · updated 7 Aug 2026

In one line: for each staff member, open Human Resources, find them, and **Onboard** — you only really enter their **joining date** and **current salary**. The system fills in bank details, statutory deductions, and pre-selects their team for you.

1 · Getting in

- 1 Go to **admin.drivelah.com** and sign in with your **Drive lah email** (the same Google login you use for email).
- 2 On the dashboard, open the **Human Resources** card.
- 3 You'll see the **employee list**. Everyone who works at Drive lah is here; the ones not yet set up show as **Pending**.

Can't see Human Resources? You need the HR access. Ask Gaurav to grant it — then log out and back in.

2 · Onboarding a person

Find the person in the list and click **Onboard**. Fill the form top to bottom:

Start Date (Date of Joining) **REQUIRED**

The day they joined Drive lah. **You cannot onboard without this.**

Payroll Entity **REQUIRED**

Which company pays them — e.g. *Drive lah Singapore* or *Drive lah Australia*. This also sets the default salary currency.

Nationality

Type it in — e.g. *Indian, Bangladeshi, Singaporean, Australian*.

Salary Expense Code **REQUIRED** **PERMANENT**

The accounting bucket their salary is booked to. Pick the right one — for most it's **6000 – Salaries & Wages**; on-ground team = **5061**; customer support = **5063**. **This cannot be changed after onboarding**, so get it right. If unsure, check with Finance.

Salary **REQUIRED***

• **Gross amount** — their **current** monthly/annual gross. **Do not enter old or past salaries** —

just what they earn now.

- **Currency** — defaults to the entity's currency; change it if they're paid in another (e.g. **INR**, **BDT**, **USD**) — every currency is available.
- **Effective from** — when this salary started; defaults to the start date.

*If the salary isn't finalised yet, tick "**Skip for now (add later)**" — the person is onboarded but marked not-yet-payable. Add the salary when ready.

Employee Type **REQUIRED**

Full-Time, Part-Time, or Contractor.

Teams **PRE-SELECTED**

Their team is **already selected** from the company directory. **Leave it as is** unless it's genuinely wrong — teams drive KPI reporting, so don't change them casually.

Bank details **AUTOMATIC**

Nothing to enter — these come from Wise automatically.

- 1 Click **Onboard**. A green "Successfully Onboarded" confirms it's done.

The golden rules

- **Joining date is mandatory** — no onboarding without it.
- **Current salary only** — never back-fill old salaries.
- **Salary code is permanent** — it can't be changed later, so pick carefully.
- **Don't touch Teams** unless it's wrong — they're pre-selected and drive KPIs.
- **Salary can wait** — use "Skip for now" if it isn't final; add it later.
- **Never type bank details** — Wise handles that.

3 · Offboarding a person

- 1 Find the employee in the list and click **Offboard**.
- 2 Enter their **last working day (end date)**.
- 3 Confirm. Their payee record is deactivated and they stop being payable — but their **history stays** for records.

Offboarding does not delete anyone — it just marks them as left. If someone returns, they can be onboarded again.

4 · If something goes wrong

- **"Internal server error" on save** — try once more; if it persists, screenshot it and send to Gaurav / Finance.
- **Dropdowns look empty** (entity or salary code) — hard-refresh the page (Cmd/Ctrl + Shift + R) and try again.
- **Wrong salary code after onboarding** — it's permanent by design; contact Finance to correct it at the ledger level.
- **Anything unclear** — ask Gaurav before guessing. It's better to pause than to enter something wrong.
